

# Resume

I'm a developer based in Philippines  with 1 year of part time experience in the web development.

My focus area for the past few months has been front-end development with javascript, css , but I'm also skilled in back-end development with PHP. I'm willing to train and learn new technologies.

## Work experience

## **Fullstack web developer**

Solabon - Tarlac - 2018 (part time)

## **Laravel developer**

Abtech - 2020 (full time)

## **Fullstack web developer**

Webusoft - 2021 (part time)

---

## **Technology**

### **Javascript**

I use this as front end language, I also use some of its available libraries and frameworks such as jquery, alpinejs, vue.js and react

### **PHP**

I use this as my backend languages that handles all server side operations, database manipulation of my applications. Laravel framework helps me a lot to write program with PHP.

### **CSS**

With this tool, we will able to make our web app interface much nicer and gorgeous.

I also use some framework such as Bootstrap , tailwindcss and bulma.css.
